

Magnetic Adjustable Link

Series AA-192

- ❑ Magnetic Adjustable Links are a twin unit possessing a multi angle capability.
- ❑ It can be quickly located at any angle by the turn of a wing nut thus providing the simplest and most rapid means of clamping together, two light weight ferrous parts.
- ❑ A powerful grip is exerted by two permanent magnets housed in each of two rectangular blocks which are connected laterally by a pair of side pieces.
- ❑ By using the link in multiples, the most complex arrangement of sheets and strips can be firmly and easily secured for welding and assembly.

Specifications:

Sr. No	Cat. No.	Size in mm L X W X H	Overall Length mm	Magnetic Pull kg.
1	AA-1928	50 X 25 X 25	125	15

Magnetic Positioner

Series AA-192

- ❑ Magnetic Positioner supplied in a set of two will hold round or flat parts at any required angle.
- ❑ Each of the magnetic blocks has two magnetic faces.
- ❑ The positioner is locked by tightening the central locknut by a spanner.
- ❑ If necessary the blocks can be dismantled from the side straps and used individually as work holders.
